REMARKS/ARGUMENTS

Claims 1-23 are pending in this application. Claim 1 is amended to correct antecedent basis. FIG. 2 is amended with the reference 40. The specification is amended to recite the application serial number for the incorporated reference. No new matter is added.

Applicant gratefully appreciates the Examiner's indication that claims 1-23 are allowed and that claims 1-11 would be allowable if rewritten to overcome informalities. Applicants have accordingly amended the claims to enable all of pending claims 1-23 to be allowable.

FORMALITIES

The Office Action objects to the drawings. Specifically, the Office Action objects that the outer conductor and the balun end is not illustrated in FIG. 2. Applicant has amended FIG. 2 to include the subject matter discussed in the specification, as demonstrated in the attached replacement figure. Accordingly, Applicant respectfully requests withdrawal of this objection.

The Office Action objects to the disclosure for lack of serial number and/or incorporated reference. Applicant has amended the specification to reflect the correct serial number. Accordingly, Applicant respectfully requests withdrawal of this objection.

The Office Action rejects claims 1-11 under 35 U.S.C. §112, second paragraph. Applicant has amended claim 1 to obviate this rejection. Accordingly, the withdrawal of this rejection is respectfully solicited.

Applicant has not amended claims 9-10 as claim 9 is not in conflict with claim 10 as Applicant is claiming a reversal of the input signals into the respective antenna feed lines. Claim 10 offers an alternate mode of operation to that of claim 9. Therefore, these claims do not
